

THE CLEAR CHOICE

Spec-SHIELD® Food Guards

The unique design of Eagle's Spec-SHIELD® Adjustable Food Guards, allows you to easily adjust the height and angle of the glass panels (without the use of tools) to best match your service style. SpecShield® has no holes in the glass panels, allowing for flexibility in mounting locations, making installation simpler and allowing for easy adjustments in the field.

Available as self service and cafeteria configurations, SpecShield® food shields bring another unique Eagle advantage to our product offering and offer you a clear benefit over others in the marketplace.

Spec-SHIELD® - Innovative Design, Easy Adjustability and Simpler Installs .. Another Eagle Advantage..

Profit from the Eagle Advantage®

What is

Spec-SHIELD®

Eagle's Spec-SHIELD® is an innovative, fully-adjustable sneeze guard / counter protector system. Glass is held in place with patented-design casting that allows for ease of glass adjustment as well as easy removal for cleaning. Angle of front glass adjusts in 18° increments, allowing for acceptance by local health codes as well as meeting NSF requirements.

UNIQUE PATENTED DESIGN = 3 PATENTS

Patent Nos. 9,538,868; 9,516,958; 9,339,131;
9,326,621; 9,723,935

Spec-SHIELD® mounted to Director's Choice® 4-well hot food unit

How it works...

Pull knob for angle adjustment of panels

Angle adjusts in 18° increments.

Split casting for removal or adjustment

Loosen set screws to separate split casting, allowing for removal of entire sneeze guard assembly and adjustment of height.

Set screws for adjustment of panels

When loosened, adjacent rod can slide freely inside the housing, allowing for movement of panel without the need to move or take apart the split casting.

In addition to our website, Spec-SHIELD® can be found in the following libraries:

Design and Construction Features

- No holes in glass panels allows for flexibility in mounting locations
- Front glass is adjustable vertically and may be rotated on 18° increments
- Top glass is adjustable horizontally.
- 1" stainless steel posts
- Mounting plates are cast aluminum with stainless steel covers
- Die cast aluminum with chrome finish brackets
- 3/4" radius corners on all glass panels
- Top glass is 3/8" thick
- Front glass is 1/4" thick. Optional 3/8"-thick front glass required for spans over 54"
- End glass included

Options / Accessories

- Heat lamps
- Lights
- 3 5/8" round mounting plate
- 3" Oval mounting plate
- 3" Oval offset mounting plate
- 2" x 8" rectangular mounting plate
- 3-point anchor
- Custom lengths available

EAGLE OFFERS PERSONALIZED BRANDING!

Eagle offers personalized branding of graphic designs as an option on portable bars, Director's Choice® cafeteria serving units and SpecFAB® custom counters.

Select from stainless steel, various plastics, laminates, solid surface man-made and naturally occurring materials, woods, magnetic sheets

and designer aluminum. We provide a 3D rendering of your logo or design prior to production.

Here's an idea, LIGHT IT UP!

Laser etched cast acrylic or multi layer acrylic effects. Lighting options include low voltage LED in single or variable colors. Stainless steel or millwork trim completes the custom look.

Consider Eagle's D.C. Modular Cafeteria Serving Line...

Eagle's Director's Choice® Modular Cafeteria Serving Units are 30" wide and available in three working heights - the standard 34" which complies with ADA guidelines for accessibility standards, 30" for middle schools, and low profile 28" for elementary schools. Each unit is fully mobile on standard 5" casters, two with brakes on server side. The frame and top are constructed of type 304 stainless steel. A docking device keeps adjoining units together without the use of tools. All units come with a standard front laminate panel—holly berry red (Wilsonart® D307-60)—mounted on galvanized subpanel. Many options are available, including decorative laminate or stainless steel end panels and front panels, removable undershelves, rear doors and panels, tray slides, work shelves, and single- or double-tier glass sneeze guards. Custom accessories include decorative deluxe sneeze guards, decorative perimeter skirt and inboard casters.

Quality Stainless & Millwork Fabrication

Eagle's SpecFAB® Division was formed to fill the gap between standard equipment and high-cost, wish-and-wait-for highly customized equipment. SpecFAB® provides a way to short-cut the design and fabrication process. Depending on our customer's need, we can build custom configurations from scratch or we can design from our superior modular components. Having this flexibility means we can deliver custom equipment faster and at a lower cost. There's more that separates SpecFAB® from other custom equipment providers. It is the investment in the most sophisticated manufacturing systems that means each and every custom piece is consistent. We can make multiple pieces with repeat precision, just like standard equipment.

Utilizing AutoQuotes® and SpecQuote® quotation software packages, our quotation department will prepare a custom quotation to meet your individual project needs. Working with the latest AutoCAD® software, Eagle's design staff will prepare submittal drawings for customer approval. These submittal drawings are supplied with quotations as needed. Eagle Group also has the largest catalog entry in the Auto Quotes system with virtually thousands of models to choose.
