# Why Choose Eagle Hand Sinks

## The Eagle Advantage!

1.

### Positive Drain Bowl Design

We offer the industry's only deep-drawn positive-drain bowl, assuring complete drainage and meeting even the most stringent health code requirements.

2.

### Exclusive MICROGARD® Protection adds another level of protection

Many of our hand sinks are available with our exclusive MICROGARD® option. The MICROGARD® antimicrobial finish is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on surfaces that causes stains, odors and degradation. Eagle's MICROGARD® combines inorganic antimicrobial silver ions with a patented delivery system. The silver ions react with bacteria in three ways: 1) suffocates the cell, 2) stops the cell reproduction system, and 3) stops the cell from growing. Our inorganic compound is guaranteed to work for life.

**MICROGARD®**

3.

### Over 40 Models Available

Traditional Hand Sinks  
Space-Saver Hand Sinks  
Hand Sinks with Wrist Handles  
Electronic Hand Sinks -  
AC & Battery Power  
Knee/Foot Valve  
Operated Hand Sinks

## Hand Sinks with Eyewash—ADA and OSHA compliant

Introducing Eagle’s newest addition: The Hand Sink with Built-In Eyewash! The unit’s design saves space and fits easily into any work environment. Eyewash unit operates quickly by pulling swing arm down 90° over sink. Vandal-resistant ceramic valve limits wear and tear on moving parts, providing dependability and long lasting performance. Safe, steady water flow under varying water supply conditions, from 30 to 90 PSI, is assured by integral flow control in the sprayhead assembly. Eyewash spray heads contain an antimicrobial agent to protect the spray heads.
