* MICROGARD®...

...is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on shelf surface that causes stains, odors and degradation.

...combines inorganic antimicrobial silver ions with a patented delivery system. The silver ions react with bacteria in three ways:

- 1) suffocates the cell, 2) stops the cell reproduction system, and 3) stops the cell from growing.

...is standard on all EAGLEgard® shelving.

Quad-Adjust® Wire Shelving

see spec sheet **EG01.14A**

Quad-Adjust® shelf assembled to posts (see page 13 for posts)

PATENTED!
(patent #7,992,731)

Each shelf corner fits in collar mounted to split sleeve

patented
QuadTruss®
design
(Patent #5,390,803)

Patented QuadTruss® Design

makes shelves up to 25% stronger and provides a retaining ledge for increased strength and product retention.

FEATURES:

- Shelves feature special interlocking corners that fit in collars mounted to split sleeves, allowing addition or removal of a shelf without the need to disassemble the entire shelf unit.
- Tapered split sleeves create a positive lock that becomes stronger as the load increases.
- Posts (page 13) are numbered in increments of 1" (25mm) to ensure fast and level assembly.
- Leveling feet are provided to help compensate for uneven floor surfaces.
- Shelves utilize patented QuadTruss® design: the mat wires are sandwiched between two top truss wires, adding significant strength and distributing the entire load without stress and strain on the welds.

Note: To create a mobile shelf unit, top and bottom shelves must be standard shelves (page 6).

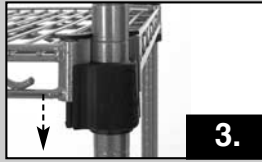

HOW TO ASSEMBLE:

1.
Snap split sleeves onto post over number of your choice.

2.
Attach Quad-Adjust® collar onto split sleeves.

3.
Slide shelf into slots in collar to complete.

Weight capacities and packaging are the same as that of Wire Shelves (page 6).

QuadPLUS® Polymer Dunnage Racks

see spec sheet **EG01.47E**

stationary QuadPLUS® polymer dunnage rack

patented
QuadTruss®
design
(Patent #5,390,803)

Patented QuadTruss® Design

makes shelves up to 25% stronger and provides a retaining ledge for increased strength and product retention.

- Green polymer louvered or solid shelf mats lay on top of wire shelf.
- MICROGARD® protection standard on mats and on EAGLEgard® coated shelves.
- 1" (25mm)-diameter posts grooved on 1" (25mm) centers, allowing for the adjustment of the shelf and 3-sided frame.
- Temperature rating for mats: Up to 200°F for intermittent exposure to cleaning, such as a dishwasher.
- Mats have a temperature rating of -20°F to 125°F under continuous use.
- Easy assembly—no tools required!
- 14" (356mm) height.

Stationary Racks — 1,000 lbs. (453.6 kg) weight capacity.

HOW TO ASSEMBLE: Add-A-Shelf® Collar

Numerically calibrated grooved posts, tapered plastic split sleeves and shelf collars combine to make shelving assembly a **SIMPLE 3 STEP EXERCISE:**

1. Snap split sleeves onto post over the number of your choice.

2. Slide collar over split sleeves. When together, a positive lock is created without the use of tools.

3. Place shelf over collar to complete.

MICROGARD® ...

...is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on shelf surface that causes stains, odors and degradation.

...combines inorganic antimicrobial silver ions with a patented delivery system. The silver ions react with bacteria in three ways:

- 1) suffocates the cell, 2) stops the cell reproduction system, and 3) stops the cell from growing.

...is standard on all EAGLEgard® shelving and components.

CAPACITY

PATENTED!
(patent #10,159,339)

Q-LEVER® Shelving
has a load bearing capacity of 600
lbs. per shelf and 1,000 lbs. on the
bottom dunnage shelf. Unit safely
holds up to 2,800 lbs.

ADDITIONAL NOTES

- Evenly distribute the weight across each shelf, and keep heavier loads on the bottom.
- Unit must be bolted to the floor if bottom shelf is removed.
- Unit must be placed on a level surface to avoid a tipping hazard.

5-Tier Starter Unit

Starter and Add-On Units joined

Overview...

- Maximizes storage, free standing shelving allows access to all corners.
- With no front uprights, accessibility and productivity are improved.
- Uprights utilize 2" adjustment for shelf and accessory spacing.
- Shelves and accessories can be easily adjusted without tools.
- Can be expanded side to side with Add-On units which share a common upright with existing unit; saving cost and space.
- Units allow for sheet metal or wire overlays.
- Sizing available:
 - Widths: 18", 21", 24" and 30".
 - Lengths: 24", 30", 36", 42", 48", 54", 60", 66" and 72".

Quality...Value...Reliability!

The **EAGLE Advantage** can be summed up in two concise points: price/value leadership and value-added service. EAGLE GROUP is committed to providing you and your customer high-quality products while maintaining the cost competitiveness necessary in today's marketplace.

All 414 Series Sinks

- 14" (356mm) deep seamless deep-drawn bowls to meet the most stringent health codes while maintaining the value and quality only a drawn bowl can offer.
- Have an extra-high 9½" (241mm) backsplash with upturn for easy and clean installation.
- Incorporate the "strength by design" feature of leg gussets welded to plates adjacent to bowls for maximum weight support and stability.
- Integral drainboards are creased for maximum drainage and fully incorporate NSF standards
- Are available in more standard sizes than the competition.
- All sinks shipped fully crated.

All FN SPEC-MASTER® Series Sinks:

- Are constructed of 14 gauge type 304 stainless steel.
- Include 14" (356mm) deep fabricated type bowls to meet the most stringent health codes.
- Adjustable crossbracing on all four sides.
- Utilize a fabricated bowl design for those jobs where quality and durability are paramount.
- Have an extra-high 9½" (241mm) backsplash with upturn for easy and clean installation.
- Utilizes heavy duty stainless steel gussets and legs with stainless steel side stretchers.
- Integral drainboards are creased for maximum drainage and fully incorporate NSF standards.
- Are available in more standard sizes than the competition.
- All sinks shipped fully crated.

Optional MICROGARD® for Hand Sinks!

(See pages 163-172 for applicable hand sinks.)

- MICROGARD® is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on the surface that cause stains, odors and degradation.
- MICROGARD® combines inorganic antimicrobial silver ions with a patented delivery system. The patented delivery system triggers the release of silver ions which react with bacteria in three ways:
 - 1) Suffocates the cell.
 - 2) Stops the cell reproduction system.
 - 3) Stops the cell from growing.
- MICROGARD® is a second line of defense. In keeping with good hygiene practices, clean this product as usual. The protection will not wash out, while organic bactericides may.**
- MICROGARD® is applied onto top and underside of sink deck, backsplash, and inside & outside of sink bowl (excludes faucets, drains, towel/soap dispensers, waste receptacle, skirt, pedal valves, and nail brush holder).

* MICROGARD® does not protect users or others against bacteria, viruses, germs or other disease organisms. Always clean this product thoroughly after each use.

** Note: To clean, use mild soap and water, rinse, and wipe entire surface dry. Soft non-abrasive cleaners may be used when necessary. Strong abrasive cleaners will scratch and dull the surface.

**412, 414, and 314 Series Sinks
Deep Drawn Construction**

- Deep drawn seamless covered corner sink bowls of all units have a generous radius and are rectangular for maximum capacity.
- Legs are galvanized, 1½" (41mm) diameter.
- Crossbraced front-to-back with 1" (25mm) diameter galvanized tubing.
- Leg gussets are welded to a die-cut heavy-gauge reinforcing plate, and welded adjacent to sink bowl for maximum stability and support.
- 9½" (241mm) standard backsplash includes 1" (25mm) upturn and tile edge for easy installation and feathering to wall/splash surface.
- Basket-type waste drains are included to fit sink bowl's 3½" (89mm) opening and feature 1½" (38mm) outlet.
- 30" and 36" (762 and 914mm) drainboards available upon request.

Note: Stainless steel legs with front-to-back crossbracing available (does not include stainless steel feet).
To order, add suffix "-SL" to model number (example: 414-16-1-SL).

To order stainless steel legs and gussets, add suffix "-SLG" to model number (example: 414-16-1-SLG).

Adjustable front-to-back crossbracing available.
Add suffix "-ACB" to model number (example: 414-16-1-ACB)

Left-to-right crossbracing available.
For galvanized, add 5% to list price and suffix "-CBG" to model number.
For stainless steel (does not include stainless steel legs), add 10% to list price and suffix "-CBS" to model number (example: 414-16-1-CBS).

Twist drain brackets available.
Works in conjunction with optional twist handle drains (not included – see page 260). To order, add suffix "-TB" to model number. (example: 414-16-1-TB).

For overflow hole (does not include drain), add suffix "-OF" to model number (example: 414-16-1-OF).

Anti-Splash Floor Troughs

see spec sheets **EG25.01A** **EG25.01B**

**Patent #
D519,618 S.**

(see chart below for dimensions A through E)

"Anti-Splash" design assures complete drainage while preventing splashing back onto the floor.

- Built-in pitch towards drain ensures complete drainage.
- Secured with anchor straps.
- Stainless steel drain accommodates up to a 4" (102mm) diameter pipe, and removable perforated stainless steel basket.
- Stainless steel subway-style grating or fiberglass grating.

FEATURES:

Note: Custom sizes available. Contact factory for pricing.

Gray Fiberglass Grating available.

To order add suffix "G" to model #.

Example ASFT-1218-FGG.

Note: Floor Troughs with ADA-compliant Grating* available! Provides a more solid walking area, and objects are less likely to fall through. Available in gray only. For Floor Troughs with Fiberglass AND Stainless Steel Grating! To order, add suffix "-ADA". **Example: ASFT-1224-SG-ADA.**

...with Yellow Fiberglass Grating

* Troughs with optional ADA-compliant Fiberglass Grating features wider T-bars resistant to corrosion, skid, fire, chipping and cracking. To order, add 5% to list price.

Replacement Subway-Style Grating for Floor Troughs and Drains

see spec sheet **EG25.02**

Stainless Steel Grating

- Constructed of 5/16" x 1" (5 x 25mm) vertically positioned bars, spaced 1" (25mm) apart to allow ease of drainage.
- 13/16" (21mm) clearance between bars prevents casters on mobile equipment from wedging in grate.
- Two 5/16" (8mm) rods, set 2 1/4" (57mm) in from each edge, are welded to the bars to eliminate swaying.
- Standard on floor troughs.
- Sizes available fit floor drains up to 24" (610mm) wide.
- Grates 12" and 15" (305 and 381mm) wide feature three rods.
- Grates 21" (533mm) wide feature five rods.

Wide "T" Bar Fiberglass Grating — ADA-compliant!

- Conforms with the Americans with Disabilities Act for use with the physically handicapped.
- Provides a more solid walking area than traditional "T" bar shape, and prevents objects from falling through grating.
- Corrosion-, skid- and fire-resistant.
- High strength, low thermal conductivity.
- Resistant to chipping and cracking.
- Temperature rating of 250°F.

Fiberglass Grating

- Constructed of 1" (25mm) high yellow or gray polyester material with a non-slip grit on top surface.
- Tapered "I" beam construction for ease of cleaning and draining.
- Temperature rating of 250°F.
- Other sizes available—consult factory.

Patent Nos. 9,538,868; 9,516,958;
9,339,131; 9,326,621; 9,723,935

Food guard angles and height adjust easily!

Food guards are easily removable!

A variety of sizes and styles available! See pages 254, 255 and 260.

Pull knob for angle adjustment of panels

- Angle adjusts in 18° increments.

Split casting for removal or adjustment

- Loosen set screws to separate split casting, allowing for removal of entire food guard assembly and adjustment of height.

Set screws for adjustment of panels

- When loosened, adjacent rod can slide freely inside the housing, allowing for movement of panel without the need to move or take apart the split casting.

See page 259 for NEW Director's Choice® Adjustable Height Option.

Hot Food Units

see spec sheet **EG33.02**

Sealed Well Hot Food Gang Drop-In Units

see spec sheet **EG35.12**

Designed for installation into a counter fixture.

Note: 240V units shown as “240T6” (example: SGDI-1-240T6) may be operated at 208V. This will reduce available amperage and wattage by 25%.

AutoFill®* automatic water fill system available for 2- to 6-well models with drain. **NSF- and UL-approved.** To order, replace prefix “SGDI” in model number with prefix “SGDIA”. **Example: SGDIA-2-240T-D.** Consult factory for pricing.

- Completely wired and ready for installation.
- Well openings accommodate 12” x 20” (308 x 508mm) pans up to 6” (152mm) deep.
- Wet or dry operation.
- Wired for single-phase operation, and can easily be converted for three-phase operation in the field—except on one-well units.
- Top constructed of heavy-gauge 300 series stainless steel.
- The body is enclosed with galvanized steel and lined by 2” (51mm) of fiberglass thermal wool insulation.
- The bottom is easily removed for servicing.
- All units are supplied with a front-mounted control panel.
- Individual thermostatic control with a positive “Off” position and an amber light to signal a power-on condition.
- Control knobs are recessed into a one-piece, front-mounted control panel.
- The flexible conduit connecting the body enclosure and control panel is 24” (610mm) on all models except one-well units, which have a 36” (914mm) flexible conduit.
- All wiring terminates in a junction box.
- Units ordered with drains are connected by 3/4” (19mm) diameter copper pipe and fittings to a single ball valve.
- Units with multiple wells are designed so the valve can be mounted to the operator’s left or right with the drains closest to the operator.
- Valve is shipped loose, to be field-installed.

 modular bar die

- Underbar equipment can be mounted to, or just placed against, modular bar dies. Bar dies must be securely fastened to the floor. For added stability, fasten one or both ends to a wall.
- Bar dies enclose and hide soda, beer, electrical and plumbing lines in a chase incorporated into the unit.
- The chase serves as a rear wall and splash. Front of the bar can be covered by removable panels that provide easy access to the chase for future modifications and maintenance.
- Panels can be covered in a decorative laminate, an elegant wood millwork finish or a stunning stainless steel finish.
- Add decorative brass or chrome rails and fittings to match any decor.
- Optional factory U.L. wiring and plumbing package.

See page 301

***A simple solution to a frustrating situation...
“HOW CAN WE GET ALL THIS FROM HERE TO THERE?”***

**PANCO®
Transport Racks
provide the most efficient
way to handle the many
items required in the
preparation, serving and
storage of your
products.**

PANCO® Transport Racks succeed in pairing efficiency with durability. Developed in conjunction with the needs of the customer, the following features make PANCO® mobile open utility racks the choice of the foodservice industry.

- Designed with the end user in mind to endure the test of time. All PANCO® racks are constructed of stainless steel or high-strength extruded aluminum sections.
- Units roll, glide and maneuver easily with non-marking NSF® approved swivel casters.
- Rack slides are designed to fit most popular tray sizes and are configured to accommodate a variety of products.
- Available in several widths and heights, PANCO® provides the perfect size open transport rack to fit your needs.
- While all transport units can also be used as storage areas, there are workstation and refrigerator roll-in models as well.

To order Transport Holding Cabinets with options/accessories:

see spec sheet **EG60.28**

Build a model number, based on the chart on page 363.

The following chart lists the design elements available. Each chart column contains two or more choices of each design element (*examples: half or full size, etc.*). To spell out a model number, choose the designated letters and numbers in the chart below from left to right. **Example: #HCFWSDI-RA2.25-240** indicates a full size Heating Cabinet (HCF), wide width (W), with solid (S) dutch door (D), insulated (I-), wire slides (RA), 2.25" slide spacing (2.25-), and 240-volt 15-amp electricity (240).

Note: Standard design elements are indicated in **bold** text in the chart below.

Quality Stainless & Millwork Fabrication

Quality Stainless & Millwork Fabrication

EAGLE GROUP's SpecFAB® Division fills the gap between standard equipment and high-cost, highly customized equipment. Depending on the custom need, configurations can be designed from pre-fab pieces by using existing components, or designed completely from scratch to match exacting consultant and architect's plans and details. This flexibility means custom equipment can be delivered faster and at a lower cost directly to the job site.

We Make it Easy for You

First – we did our homework so you don't have to. With more NSF and UL approvals than any other equipment manufacturer in the field, we make sure our equipment meets or exceeds industry standards and is manufactured with health and safety codes in mind.

Second – the process of submitting a quote has been streamlined to ensure the process is as quick and efficient for our customers as well as our SpecFAB® team. The process starts by a phone call or an e-mail sent to quotes@eaglegrp.com.

Third – prompt, efficient delivery. We do our best to ship your counters and bars fully assembled and crated. We work with manufacturing schedules to meet stringent deadlines and offer on-site installation services.

You will speak directly with people, not voice mail. Real-time access to the status of your order, instantaneous direct order entry, and order processing are available at the time of your call. Real-time access, whether it is about inventories, manufacturing schedule, shipping status, or delivery date.

Product details start as an idea.... ideas that we build on. Using the latest computerized tools, our Design Engineering team takes these ideas to reality in a way that ensures they'll work best for our customer and can be manufactured to the highest standards at competitive prices.

Depending on our customer's needs, we can build custom configurations from scratch, or we can design superior modular components using our standard product offering with modifications and options.

Raised rail units come sized to fit six-1/6 pans through thirty-1/6 hotel pans. Pan ledge is recessed 2" and will hold 6" (152mm) deep pans (*pans not provided*), full width NSF cutting board and stainless steel hinged night cover.

Sandwich style units come with one 12" x 20" (305 x 508mm) opening per section with recessed pan ledge to hold 6" (152mm) deep pans (*pans not provided*), full width NSF cutting board and stainless steel hinged night cover. Stainless steel hinged compressor access panel.

Chef's Counter

see product announcement **EG8123**

Standard components used to create a system customized to meet your needs!

Designed by EAGLE's SpecFAB® Division, these units are engineered to provide custom configurations using pre-engineered modular components.

Among the many modular design options are open based cabinets, closed base cabinets featuring either hinged or sliding doors as well as cabinets that accept hot well and refrigerated drop-ins. Refrigerated undercounter storage and drawers can also be accommodated in all modular designs.

Island units are designed with chef and server pick-up sides at different heights. This design not only increases worker efficiency but also incorporates a unique tray-lock feature to prevent accidents and spills. If desired, the server side can also accommodate an 18" (457mm) wide wire shelving unit positioned below the tray pick up surface. Choose from either stationary or mobile design options, depending on needs.

- Standard Terms and Conditions of Sale - Effective January 2025

These terms and conditions, as may be modified by Metal Masters Foodservice Equipment Co., Inc. d/b/a Eagle Group's ("Eagle") sales quotation or proposal, and all documents incorporated by specific reference therein are the complete agreement ("Agreement") governing the sale of goods ("Goods") by Eagle to the customer ("Customer"). Customer's placement of an order manifests Customer's assent to this Agreement. This Agreement shall govern in the event of a conflict between this Agreement and any purchase order or other document from the Customer. This Agreement shall not be modified without a writing signed by Eagle and Customer.

PRICES

All merchandise will be billed at our current published list prices in effect at the time of shipment. Freight charges are in addition to merchandise charges unless shipped freight collect or freight prepaid at customer expense. Any sales tax or export fee Eagle must collect will be added to the Customer's invoice. Order consolidation is available for an additional charge.

PERFORMANCE

All shipping dates are approximate. Eagle is not responsible for any delays in processing, production, or shipping. Fulfillment is always subject to the availability of material and to conditions affecting shipment that are beyond our control. Eagle shall not be held liable for any delay.

SHORTAGE

All claims for shortage must be brought to our attention within five (5) business days from the date merchandise is received. Failure to notify Eagle Group of any shortage within five (5) business days of receipt shall result in a waiver of any claim of a shortage. Please be certain that you receive the number of packages signed for. A clear delivery ticket constitutes shipment was delivered without shortage and releases Eagle from liability.

CANCELLATIONS

Cancellations are not accepted on orders in transit, custom items, and electro-polished items. Standard orders that are canceled in production will be subject to up to a 30% cancellation charge.

RETURNS

Custom, modified standard equipment, and electro-polished items are non-returnable.

Authorization Policy for Standard Returns:

- ✓ \$75.00 minimum on merchandise returns exclusive of freight.
- ✓ Written approval from Eagle's Customer Service is mandatory on all returns.
- ✓ Return authorization must be requested within 60 days from the date of shipment.
- ✓ Authorized return shipments, in which merchandise is not defective and orders have been properly filled, must be shipped prepaid and properly packaged in original Eagle Group packaging to prevent merchandise damage.
- ✓ Each return authorization number must be written on the outside of each carton returned to Eagle.
- ✓ No credits will be processed for a return until we have confirmation that the item has been received, has been inspected, and is confirmed that the item is in unused, new, and sellable condition. All items returned without proper authorization will not be credited and Eagle Group will not be responsible for shipping costs associated with the attempted return.

Restocking:

- ✓ Restocking and equipment repair fees for merchandise damaged during return shipment to Eagle will be withheld from the issued credit.
- ✓ Returns of made-to-stock merchandise are subject to a 30% restocking fee.
- ✓ Returns of standard made-to-order merchandise are subject to a 50% restocking fee.
- ✓ Returns of Cool Trough® Water Tempering System floor troughs (Models beginning with ASWT and WT) are subject to a 100% restocking fee.
- ✓ The minimum restocking fee on merchandise returns shall be \$75.00.

CUSTOM ORDERS & DRAWINGS

Custom orders require submittal drawings for customer approval prior to the start of fabrication. All prints and drawings submitted with orders are accepted as final approval in the custom order process. Errors that arise due to incorrect submittals are the responsibility of the customer. If an order is canceled after drawings are provided by Eagle, a drawing fee equal to 10% of the custom item's net value will apply. Orders for custom work already in production are not permitted to be canceled.

DAMAGES

EAGLE's responsibility ceases immediately upon our retaining receipt of pickup from our dock by the transportation company. Therefore, all liability passes to the customer at our loading dock (FOB Origin), regardless of who pays the carrier, except in the rare case that we deliver using our truck (not a common carrier). If a container shows rough handling, do not give the carrier a clear delivery receipt and inspect the merchandise immediately or refuse the piece(s) of damaged merchandise. Note the damage on the delivery receipt/bill of lading while the driver is there. If you sign your name on the freight bill without noting any damages, then you are stating you have received your order/shipment in acceptable condition. Upon finding damage while unpacking the product, call the carrier without further unpacking, ask for an inspection, and follow-through by filing a claim with the carrier immediately. Concealed damage claims must be reported in writing to the carrier within five (5) business days of receipt.

ORDER APPROVAL

All orders are subject to final approval by Eagle's home office. Acceptance and/or performance shall be at all times subject to the approval of Eagle's Credit Department. A deposit may be required on larger orders, the amount of the deposit is to be determined at Eagle's sole discretion based on payment history and D&B reports. Minimum order of \$50.00 net after any credits required. Shipping cost is not included towards the minimum order.
